

Core - Bug # 58019

Status:	Rejected	Priority:	Must have
Author:	Philipp Gampe	Category:	File Abstraction Layer (FAL)
Created:	2014-04-17	Assigned To:	
Updated:	2015-01-29	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.5		
Complexity:	easy		
Is Regression:	Yes		
Sprint Focus:	On Location Sprint		
Subject:	FAL Indexer for broken files: Column 'width' cannot be null		
Description			
The FAL indexer fails to properly handle broken files.			
To reproduce:			
Create a text file with any content and name it test.jpg. Upload this via the backend or just place it in the fileadmin directory.			
Visit the folder containing the file in the file module to trigger the indexing.			
The indexing will fail and a NULL value is handled on to the database.			
Note: I consider this to be a regression, because broken files did not break the file list before.

History

#1 - 2014-05-13 14:14 - Oliver Hader

- Status changed from Accepted to Needs Feedback

What is breaking in this regard? I followed your suggestion and uploaded a text/plain file and faked the "jpg" file name extension.

The file list tries to show an image, which of course does not work (thus, instead of using the extension, the MIME type should be used).

However, I don't get any warnings, errors or exceptions. Besides that sys_file_metadata.width is set to "0" in my case...

#4 - 2014-09-16 01:23 - Philipp Gampe

- File fake-jpeg.jpeg added

#5 - 2014-09-16 01:24 - Philipp Gampe

You need to enable preview images and reload the file list after upload.

You might only see this error if you have set DB debug >0.

#6 - 2014-09-16 08:34 - Alexander Opitz

- Subject changed from Column 'width' cannot be null to FAL Indexer for broken files: Column 'width' cannot be null

#7 - 2015-01-06 13:40 - Mathias Schreiber

- Target version set to 7.1 (Cleanup)
- Sprint Focus set to On Location Sprint

#8 - 2015-01-29 19:34 - Philipp Gampe

You might need to enable Display thumbnails.

#9 - 2015-01-29 21:36 - Philipp Gampe

- Status changed from Accepted to Rejected

The real issue is #64616. Closing is duplicate.
