Subject:	Add visibility to member fields and methods of t3lib/		
Description	<p>There are still many "var" field declaration coming from PHP4 in Core classes. Goal is to change them either to public or (hopefully) to protected.</p> <p>The same applies for class methods.</p> <p>private may probably only be used for static classes, if used at all.</p> <p>This basically takes files at root of t3lib/ into account (issue imported from #M18048)</p>
