

commerce - Bug # 31183

Status:	Resolved	Priority:	Should have
Author:	Konrad	Category:	Bug
Created:	2011-10-21	Assigned To:	
Updated:	2015-05-26	Due date:	
Subject:	Sorting field should grow slower		
Description			
<p>When adding new articles to product, they are added to the end of articles.</p> <p>Now it's reached by multiplying highest existing sorting by 2 and setting as new attribute's sorting.</p> <p>It makes 31th attribute to have maximum possible sorting (2 147 483 647) and further attributes have this maximum sorting too. It makes then unsortable.</p> <p>I suggest changing multiplication to addition to solve the problem.</p> <p>Path:</p> <p>Index: class.tx_commerce_articlecreator.php</p> <pre>===== --- class.tx_commerce_articlecreator.php (wersja) +++ class.tx_commerce_articlecreator.php (kopia robocza) @@ -506,7 +506,7 @@ 'crdate' => time(), 'title' => \$this->createArticleTitleFromAttributes(\$PA, \$key, \$data), 'uid_product' => \$this->uid, - 'sorting' => (\$sorting['sorting'] *2), + 'sorting' => (\$sorting['sorting'] +20), 'article_attributes' => count(\$this->attributes['rest']) +count(\$data), 'attribute_hash' => \$hash, 'article_type_uid' => 1, @@ -644,7 +644,7 @@ 'uid_product' => \$localisedProducts['uid'], 'sys_language_uid' => \$localisedProducts['sys_language_uid'], 'l18n_parent' => \$articleUid, - 'sorting' => (\$sorting['sorting'] *2), + 'sorting' => (\$sorting['sorting'] +20), 'article_attributes' => count(\$this->attributes['rest']) +count(\$data), 'attribute_hash' => \$hash, 'article_type_uid' => 1,</pre> <p>Index: hooks/class.tx_commerce_tcehooksHandler.php</p> <pre>===== --- hooks/class.tx_commerce_tcehooksHandler.php (wersja) +++ hooks/class.tx_commerce_tcehooksHandler.php (kopia robocza) @@ -167,7 +167,7 @@ 'uid_product' => intval(\$localisedProducts['uid']), 'sys_language_uid' => intval(\$localisedProducts['sys_language_uid']), 'l18n_parent' => intval(\$articleId), - 'sorting' => (intval(\$fieldArray['sorting']) *2), + 'sorting' => (intval(\$fieldArray['sorting']) +20), 'article_type_uid' => intval(\$fieldArray['article_type_uid']),);</pre>
