

Core - Bug # 62184

Status:	Resolved	Priority:	Should have
Author:	René Pflamm	Category:	Content Rendering
Created:	2014-10-13	Assigned To:	Xavier Perseguers
Updated:	2015-04-13	Due date:	
TYPO3 Version:	6.2		
PHP Version:	5.6		
Complexity:			
Is Regression:	No		
Sprint Focus:	Stabilization Sprint		
Subject:	Exception using GIFBUILDER in css_styled_content texpic renderer		
Description			
If the default rendering of tt_content.image was modified so an GIFBUILDER is used and an image has an link the system break at the try to run "imageLinkWrap".			
Way to reproduce:			
<div>1. Create an image content element with one or more images</div> <div>2. Assign at least one image an link</div> <div>3. Put following in your typoscript:</div>			
<pre>tt_content.image.20.1 { file > file = GIFBUILDER file { format = png XY = [10.w],[10.h] 10 = IMAGE 10.file { import.data.cObject = TEXT import.data.cObject.data = register:ORIG_FILENAME import.data.cObject.wrap = file: :uid treatIdAsReference = 1 maxW = {\$styles.content.imgtext.maxW} maxW.override.field = register:maxImageWidth maxW.override.override.field = imagewidth maxH.override.field = imageheight } 20 = TEXT 20 { text.data.cObject = TEXT text.data.cObject.data = register:ORIG_FILENAME text.data.cObject.wrap = file: :copyright fontSize = 11 fontColor = #000000</pre>			

```
        offset = 10,17
    }
}
}
```

Now open the page and you got following Exception:

#1401732564: Invalid file identifier given. It must be of type string and not empty. "NULL" given. (More information)

InvalidArgumentException thrown in file

/var/www/vhosts/domain.tld/TYPO3/typo3_src-6.2.5/typo3/sysext/core/Classes/Resource/ResourceFactory.php in line 373.

I could fix this issue by adding the following lines to ContentObjectRenderer at line 5231 right after \$imageResource = \$gifCreator->getImageDimensions(\$theImage);

```
$imageResource['origFile'] = $theImage;
$imageResource['originalFile'] = $theImage;
```

History

#1 - 2014-12-10 15:17 - Sascha Schieferdecker

I have a similar issue with an FCE, guess it's the same Core Problem:

```
10 = IMAGE
10.file = GIFBUILDER
10.file {
    XY = 708,450
    format = jpg
    10 = IMAGE
    10.file.import = uploads/tx_templavoila/
    10.file.import.current = 1
    10.file.import.listNum = 0
    10.file.width = 708c
    10.align = c,c
    10.altText.field = field_big_alttext
    10.titleText.field = field_big_alttext
    20 = TEXT
    20.text.field = field_big_copyright
    20.fontFile = fileadmin/templates/gifbuilderfonts/arial.ttf
    20.fontSize = 9
    20.fontColor.field = field_copyright_color_big
    20.offset = 3,446
    treatIdAsReference = 1
}

10.imageLinkWrap = 1
10.imageLinkWrap.enable = 1
10.imageLinkWrap.typolink.parameter.field = field_link
10.imageLinkWrap.if.isTrue.field=field_link

10.altText.field = field_big_alttext
10.titleText.field = field_big_alttext
10.if.value.field = field_align_image_big
10.if.equals = cc
```

Uncaught TYPO3 Exception

#2 - 2014-12-16 17:15 - Michael Ganner

I got the same Exception when setting imageLinkWrap to true in the TS below. T3 Version 6.2.9

```
file = GIFBUILDER
```

```
file{
```

```
format = jpg
```

```
quality = 100
```

```
XY = 300,185
```

```
10 = IMAGE
```

```
10{
```

```
offset = 0,0
```

```
file = fileadmin/templates/placeholder_contmenu.png
```

```
file.import=uploads/media/
```

```
file.import.field=media
```

```
file.import.override.field = media
```

```
file.import.listNum=0
```

```
}
```

```
#10.file.width=300
```

```
#10.file.height=185c
```

```
}
```

```
params = class=""
```

```
#altText.field=title
```

```
altText.field=abstract//title
```

```
altText.crop=130|...|1
```

```
#titleText.field=title
```

```
imageLinkWrap=0
```

```
imageLinkWrap {
```

```
enable=1
```

```
typolink.parameter.data=field:uid
```

```
typolink.title.field=title
```

```
}
```

- Subject changed from *Excention when use GIFBUILDER in css_styled_content texpic renderer* to *Exception using GIFBUILDER in css_styled_content texpic renderer*

#7 - 2015-03-04 19:09 - Daniel Wagner

One installation produced the same exception without GIFBUILDER but with imageLinkWrap.

Maybe we have problem with imageLinkWrap? it works if I set imageLinkWrap = 0.

```
poiImage = IMAGE
poiImage {
    file.maxW = 80
    file.maxH = 80
    imageLinkWrap = 1
    imageLinkWrap {
        enable = 1
        width = 1000m
        height = 800
    }
}
```
