Sprint Focus:			
Subject:	Possibility to disable grouping in workspace module		
Description			
<p>The workspace modules uses the ExtJS component GroupingStore per default to group and nest version by page path. However, this behavior get unhandy if all versions of all pages shall be sorted by a particular column.</p> <p>A new checkbox "group by path" shall be added to the top columns menu to individually disable/enable this behavior. Changes to that state are stored with the preferences of a backend user for the accordant workspace.</p>
