Yes, I also think that this handling is very strict compared to the pre-FAL handling (image not present => image not rendered).

#2 - 2013-01-13 19:06 - Helmut Hummel

- Target version changed from 6.0.0-alpha2 to 6.0.1

#3 - 2013-02-12 14:37 - Christoph Dörfel

It's really annoying in a shared development environment.

For simplicity we're sharing one database but commit changes in the filesystem only once in a while (when a feature is fully implemented). The uploads-folder isn't even tracked through versioning.

A simple warning that doesn't interrupt your workflow should be enough.

Had to modify TYPO3\CMS\Backend\Utility with a try{}catch(){} clause to be able to continue working.

have the same Problem... if you delete a file that is used somewhere you can't even remove it from the CE as it won't let you edit it...

#6 - 2013-03-22 14:08 - Andreas Wolf

- Status changed from Accepted to Needs Feedback

I'm sorry, I could not reproduce this bug using the introduction package. I inserted a file into a content element, deleted it in fileadmin and emptied sys_file_processedfile. The backend shows me the small gray "No thumb generated" image afterwards.

Could you provide me with a more accurate description of the steps you did to provoke this error? Ideally base this on a current introduction package, as this makes it easier to reproduce the error.

This is not really the same error as described above, but probably from the same origin (I didn't investigate this yet).

@see screenshots and descriptions

edit:

File 1: Upload an image and cut it out for "cutting and pasting"

File 2: Delete this file while "cutting and pasting" is still active

File 3: Get an error

#8 - 2013-06-19 07:47 - Nico de Haen

This still happens if the bodytext contains a link to a non existing file and if the link contains a direct reference to the file:

`<link fileadmin/Downloads2/MyFile.pdf - download "Initiates file download">MyFile</link>`

The error message is (with above example):

Folder fileadmin/Downloads2/MyFile.pdf does not exist

and the editor can not access it anymore to fix the error.

You will have a lot of such links if you migrated from a TYPO3 < 6.0. due to #49233

#9 - 2013-07-04 00:41 - Alexander Opitz

@Christoph That sounds like another issue, which was fixed by Philip Gampe, should be in 6.1.2

@Nico Do you have a backtrace of this error, this would help us to find the code path.

#10 - 2013-07-04 00:41 - Alexander Opitz

- *Target version deleted (6.0.1)*

#11 - 2013-11-04 11:25 - Alexander Opitz

- *Is Regression set to No*

Hi,

is this issue resolved in newer versions? Latest one is 6.1.5.

#12 - 2014-02-20 17:19 - Alexander Opitz

- *Status changed from Needs Feedback to Closed*
