Subject:	impexp: Import in v6 fails with fal-error		
Description			
<p>I have tried an export in t3 gov v6.0.4 and a reimport in the same version. The import fails with an "Uncaught TYPO3 Exception" and message "#1317178604: No file found for given UID.". I tried varios options (include relations and not include, exclude all files) but no import were sucessful. In Version 4.7.x the file is imported.</p> <p>Here the Exception:</p> <p>Uncaught TYPO3 Exception #1317178604: No file found for given UID. Martin, could you test the patch from <https://review.typo3.org/#/c/22939/2/> if it works for your import?

You also need the patch from #49386.

Created an own issue (#52593) for my patch, because it will fix the import of 4.x exports in version 6.x only.

hi Marc, your patch works only partially

importing failed...

error: #1321023156: uid property is already set. Cannot merge index record. (More information)

Is your content based on the original 6.0.4 introduction package and you translated the content to german? Or is it updated from a older TYPO Version.

Really wondering why tt_content field multimedia is integer 0 in your data.
