[BUGFIX] Allow to disable Info->PageTSconfig again

The patch for #49992 changed the identifier for the module function to the namespaced class name, which breaks the documented option mod.web\_info.menu.function.tx\_infopagetsconfig\_webinfo = 0

Change this back to 'tx\_infopagetsconfig\_webinfo' in order to make the config option working again.

Resolves: #65638

Releases: master, 6.2
