Revision deb3c0f4 - 2014-05-13 17:58 - Frans Saris

[BUGFIX] Category tab not shown for file when filemetadata installed

As a result of the TCA caching changes the order of the manipulations done in the sys_file_metadata TCA have changed. As a result the categories tab disappears when you install ext:filemetadata.

This patch adds an extra check in the TCA override and adds the categories tab when sys_file_metadata is categorized.

Resolves: #58620

Releases: 6.2

This seems to have something to do with the Extension "Advanced File Metadata". After deactivating this extensions, the categories-tab is there. But after activating, it's gone again.

But it seems only in 6.2.2, I have a 6.2.1 installation with activated "Advanced File Metadata" and there the categories tab is there.
