[FEATURE] Use salted Install Tool password

To enhanced the security this patch changes the Install Tool password from md5 hash to a salted hashed password. Therefore the default password in the FactoryConfiguration.php is changed. Old md5 hashes get converted automatically during the boot process of the Install Tool. The output of the calculated hash is reintroduced when an error occurred. The report modules were adjusted to be able to check salted hashed passwords.

Resolves: #50613

Releases: 6.2
