[FEATURE] Add generic data-\* attribute

All elements in HTML5 can have any number of data-\* attributes.

This additional array attribute on tag bases viewhelpers makes it easier to add several data-\* attributes to them:

```
<f:form.textfield data="{foo: 'bar', baz: 'foos'}" />
```

Will render:

```
<input data-foo="bar" data-baz="foos" ...
```

This is a backport from TYPO3.Fluid
