

Core - Bug # 21283

Status:	Closed	Priority:	Should have
Author:	Steffen Kamper	Category:	
Created:	2009-10-15	Assigned To:	Steffen Kamper
Updated:	2010-08-06	Due date:	
TYPO3 Version:	4.3		
PHP Version:	5.3		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	absRefPrefix is prefixed with external js files		
Description			
<p>When using config.absRefPrefix also external files are built with absRefPrefix + http://... which leads to wrong urls.</p> <p>try this with set absRefPrefix:</p> <pre>page.includeJS { cooliris = http://developer.cooliris.com/shared/resources/js/cookie.js cooliris.external = 1 }</pre> <p>(issue imported from #M12247)</p>			

History

#1 - 2009-10-16 17:46 - Rupert Germann

I attached a new file which add absRefPrefix only when the file is not marked as external

#2 - 2009-10-16 22:57 - Steffen Kamper

however absRefPrefix is not needed as it's prefixed in TSFE::setAbsRefPrefix

There were two directories missing (extension) which i added:

typo3/ext

typo3/sysex

There were also 2 array-checks missing which leaded to error msg in admPanel, fixed in v3

#3 - 2009-11-08 17:27 - Steffen Kamper

committed to trunk, rev 6379
