Sorry, I gave too few (and wrong) information:

When I click on modules 'View', 'Filelist', 'Language', 'Extensions', 'Access', 'Backend users', 'Reports' or 'Log' I got a PHP error in BE:

#1: PHP Warning: pg_query(): in C:\wamp\www\typo3_7.2\typo3\sysextd\adodb\adodb\drivers\adodb-postgres7.inc.php line 219

And in php_error.log:

[20-May-2015 16:01:23 Europe/Paris] PHP Fatal error: Call to a member function includeLLFile() on a non-object in C:\wamp\www\typo3_7.2\typo3\sysextd\ball\mod1\index.php on line 22

- % Done changed from 0 to 100

Problem solved after (I presume) cleaning some records from pages table... Weird!
