

Core - Bug # 55152

Epic # 47018 (Resolved): Implement Composer support and clean package manager API

Status:	Closed	Priority:	Should have																																																																																																				
Author:	Christian Weiske	Category:	Extension Manager																																																																																																				
Created:	2014-01-20	Assigned To:	Thomas Maroschik																																																																																																				
Updated:	2014-02-14	Due date:																																																																																																					
TYPO3 Version:	6.2																																																																																																						
PHP Version:																																																																																																							
Complexity:																																																																																																							
Is Regression:	No																																																																																																						
Sprint Focus:																																																																																																							
Subject:	Class 'TYPO3\Flow\Package\Exception\InvalidPackageStateException' not found																																																																																																						
Description																																																																																																							
<p>When activating an extension with a dependency on a not activated but downloaded extension, I get the following exception in 6.2beta4:</p> <p>Fatal error: Class 'TYPO3\Flow\Package\Exception\InvalidPackageStateException' not found in /path/typo3_src/typo3/sysext/core/Resources/PHP/TYPO3.Flow/Classes/TYPO3/Flow/Package/PackageManager.php on line 382</p> <p>Call Stack</p> ```
20 1.3483 22047040 TYPO3\CMS\Core\Package\PackageManager->buildDependencyGraph( )  
../PackageManager.php:719  
21 1.3483 22047040 TYPO3\CMS\Core\Package\PackageManager->resolvePackageDependencies( )  
../PackageManager.php:684  
22 1.3517 22091544 TYPO3\Flow\Package\PackageManager->getDependencyArrayForPackage( )  
../PackageManager.php:800  
23 1.3517 22092568 TYPO3\Flow\Package\Package->getPackageMetaData( ) ../PackageManager.php:979  
24 1.3519 22094600 TYPO3\CMS\Core\Package\PackageManager->getPackageKeyFromComposerName( )  
../PackageManager.php:155  
25 1.3519 22094600 TYPO3\Flow\Package\PackageManager->getPackageKeyFromComposerName( )  
../PackageManager.php:451
```

The dependent extension is activated nevertheless.

A file `./typo3/sysex/core/Resources/PHP/TYPO3.Flow/Classes/TYPO3/Flow/Package/Exception/InvalidPackageStateException.php` exists and contains the class.

When re-loading the extension manager, I can see the dependent extension activated and can now activate the extension I tried at first.

History

#1 - 2014-01-31 17:09 - Thomas Maroschik

- Status changed from New to Needs Feedback
- Assigned To set to Thomas Maroschik

Does that still happen on current master?

#2 - 2014-02-12 09:55 - Ernesto Baschny

- Parent task set to #47018

#3 - 2014-02-14 10:38 - Christian Weiske

I cannot reproduce the issue anymore with 6.2beta5 (current master after 6.2beta5). Please close it.

#4 - 2014-02-14 10:40 - Thomas Maroschik

- Status changed from Needs Feedback to Closed
