

TemplaVoila - Bug # 65661

Status:	Accepted	Priority:	Should have
Author:	Alexander Schnitzler	Category:	Section Index
Created:	2015-03-11	Assigned To:	Alexander Schnitzler
Updated:	2015-07-29	Due date:	
TYPO3 Version:	4.7		
PHP Version:			
Has patch:	No		
Reporter:			
Is Regression:	No		
Affected Version:			
Subject:	Section Index does not display links but the actual content		
Description			
This must be due to a changed general rendering of css_styled_content from 4.7 on. 4.5 and 4.6 behave like desired.

It **is** actually because of the TS changes on 'tt_content.menu.20.3'.

An ugly yet effective workaround is to override all the new TS of the menu and use the old code from 4.5, just like this:

```
tt_content.menu.20.3 >
tt_content.menu.20 {
    # From 4.5...
    # "Section index (pagecontent w/Index checked - liststyle)"
    3 < styles.content.get
    3 {
        wrap = <ul class="csc-menu csc-menu-3">|</ul>
        select.andWhere = sectionIndex<>0
        select.pidInList.override.field = pages
        renderObj = TEXT
        renderObj {
            fieldRequired = header
            trim = 1
            field = header
            htmlSpecialChars = 1
        }
    }
}
```

```
wrap = <li class="csc-section">|</li>
typolink.parameter.field = pid
typolink.section.field = uid
}
}
}
tt_content.menu.20.3 = USER
tt_content.menu.20.3.userFunc = tx_templavoila_pi1->tvSectionIndex
tt_content.menu.20.3.select.where >
tt_content.menu.20.3.indexField.data = register:tx_templavoila_pi1.current_field
tt_content.menu.20.3.renderObj.if.value.field = sectionIndex
tt_content.menu.20.3.renderObj.if.equals = 1
```
