[BUGFIX][FAL] isValidFilename() fails with broken PCRE

Some php versions like debian squeeze 5.3.3 do not have proper unicode support for PCRE enabled. In effect, character classes like [:alnum:] do not contain unicode characters. Therefore, test filenamesAreCorrectlyValidated with data set "filename with german umlauts" fails on those systems.

The patch changes the according regex in t3lib_file_Driver_AbstractDriver to other, fully supported character classes.

[BUGFIX] EXT:form tests and unicode fix

This cleans up the existing EXT:form tests and adds them to the travis testsuite.

The two filter test cases fail on systems like debian with PHP 5.3.3 due to a broken PCRE environment. This issue is identical to #39123 and the fix is very similar.
