

Core - Bug # 19153

Status:	Closed	Priority:	Should have
Author:	Peter Niederlag	Category:	
Created:	2008-07-25	Assigned To:	
Updated:	2013-09-09	Due date:	
TYPO3 Version:	4.4		
PHP Version:	4.3		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	Insonsisent description/initialisation of class.t3lib_beuserauth.php->auth_timeout_field		
Description			
<p>from class description:</p> <pre>var \$auth_timeout_field = 6000; // if > 0 : session-timeout in seconds. if false/<0 : no timeout. if string: The string is fieldname from the usertable where the timeout can be found.</pre>			
<p>however from typo3/init.php:</p> <pre>\$BE_USER->auth_timeout_field = intval(\$TYPO3_CONF_VARS['BE']['sessionTimeout']);</pre>			
<p>so nothing but integers ...</p> <p>IMO timeout-handling should be passed to constructor or into a decent function, support for anything but integers could/should be dropped.</p> <p>(issue imported from #M9053)</p>

History

#1 - 2013-05-07 16:11 - Alexander Opitz

- Status changed from New to Needs Feedback
- Target version deleted (0)

As this report is very old, is the handling in newer TYPO3 CMS Versions (like 6.0/6.1) more like you expect it?

#2 - 2013-09-09 09:43 - Alexander Opitz

- Status changed from Needs Feedback to Closed
- Is Regression set to No
