

## Core - Bug # 48810

Epic # 55575 (Accepted): Streamline JavaScript Code in the TYPO3 Backend

<b>Status:</b>	Closed	<b>Priority:</b>	Should have		
<b>Author:</b>	Stefan Terborg	<b>Category:</b>			
<b>Created:</b>	2013-06-04	<b>Assigned To:</b>			
<b>Updated:</b>	2015-05-05	<b>Due date:</b>			
<b>TYPO3 Version:</b>	4.5				
<b>PHP Version:</b>					
<b>Complexity:</b>					
<b>Is Regression:</b>	No				
<b>Sprint Focus:</b>					
<b>Subject:</b>	Wrong escapeObjectId in t3lib/js/jsfunc.tceforms_suggest.js				
<b>Description</b>					
<p>The escape mechanism for the object id in the file t3lib/js/jsfunc.tceforms_suggest.js is wrong. The lines are:</p> <pre>escapeObjectId: function(objectId) {     var escapedObjectId;     escapedObjectId = objectId.replace(/:/g, '\\:');     escapedObjectId = objectId.replace(/./g, '\\.');     escapedObjectId = objectId.replace(/[ ]/g, '\\ ');     escapedObjectId = objectId.replace(/]/g, '\\]');     return escapedObjectId; }</pre> <p>which only escapes the closing square bracket. The lines should be:</p> <pre>escapeObjectId: function(objectId) {     var escapedObjectId;     escapedObjectId = objectId.replace(/:/g, '\\:');     escapedObjectId = escapedObjectId.replace(/./g, '\\.');     escapedObjectId = escapedObjectId.replace(/[ ]/g, '\\ ');     escapedObjectId = escapedObjectId.replace(/]/g, '\\]');     return escapedObjectId; }</pre>					

### History

#### #1 - 2014-03-10 16:39 - Daniel Siepmann

- Parent task set to #55575
- Is Regression set to No

#### #2 - 2015-05-05 11:19 - Riccardo De Contardi

- Status changed from New to Closed

I am closing the ticket for the following reasons:

- 1) Version 4.5 is not maintained anymore;
- 2) The lines mentioned in this ticket don't exist anymore in 6.2.12 (file has been moved to `typo3/sysex/backend/Resources/Public/JavaScript/jsfunc.tceforms_suggest.js`);
- 3) the method that replaced this code is placed in `typo3/sysex/backend/Resources/Public/JavaScript/jsfunc.inline.js` and looks different

If you think that this is the wrong decision or experience this issue again, then please write to the mailing list `typo3.teams.bugs` with issue number and an explanation or open a new ticket and add a relation to this ticket number.
