Please also see the discussion in the Core list.

For me it fails on Linux, PHP 5.3.12, [UTF8filesystem] = 0

#### #2 - 2012-05-09 12:45 - Oliver Klee

This test does not fail on my Ubuntu Linux machine which is running PHP 5.3.10.

#### #3 - 2012-05-09 13:02 - Oliver Klee

The value of UTF8filesystem does not seem to have any influence on the test failing on my Mac and passing on my linux machine.

Is this still valid after the patch for #39123 has been merged?

I'll re-test this once I've got TYPO3 running on my Mac again (where the problem occurred in the first place).

TYPO3\CMS\Core\Tests\Unit\Resource\Driver\AbstractDriverTest does not fail on my Mac anymore. So this issue can be closed.
