Subject:	t3lib_pageSelect* compatibility classes not loaded in backend		
Description	<p>When creating a new TypoScript template in the backend, TYP03\CMS\Frontend\Page\PageRepository->getPage() gets called. This method calls "getPage" hooks, which may be 4.7-compatible extensions that have to implement the t3lib_pageSelect_getPageHook interface.</p> <p>Currently, the t3lib_pageSelect_getPageHook alias mapping is defined in typo3/sysex/ext/frontend/Migrations/Code/ClassAliasMap.php, which does not get loaded in the backend - only in the frontend.</p> <p>So when creating a new TypoScript template (not an extension template), the backend crashes:</p> <pre> PHP Fatal error: Interface 't3lib_pageSelect_getPageHook' not found in cwe/typo3conf/ext/contextes/Classes/Service/Page.php on line 41 PHP Stack trace: PHP 1. {main}() cwe/typo3_src/typo3/mod.php:0 PHP 2. require() cwe/typo3_src/typo3/mod.php:41 PHP 3.
