

Core - Bug # 67668

Status:	New	Priority:	Should have
Author:	Morton Jonuschat	Category:	DBAL
Created:	2015-06-21	Assigned To:	Morton Jonuschat
Updated:	2015-06-21	Due date:	
TYPO3 Version:	7		
PHP Version:	5.6		
Complexity:	medium		
Is Regression:	No		
Sprint Focus:			
Subject:	PostgreSQL needs escaping for BLOB fields		
Description			
PostgreSQL requires data in BYTEA (BLOB) columns needs to be escaped for PostgreSQL, otherwise queries fail with:			
Core: Error handler (BE): PHP Warning: pg_query(): Query failed: ERROR: invalid input syntax for type bytea LINE 9: 'O:44:"TYPO3\CMS\Extbase\Object\Container\ClassInfo";6:{... ^ in /Users/mjonuschat/Documents/Development/TYPO3/Sites/postgresql/TYPO3.CMS/typo3/sysex/adodb/adodb/drivers/adodb-postgres7.inc.php line 219			
Manual			
bq. The bytea type supports two external formats for input and output: PostgreSQL's historical "escape" format, and "hex" format. Both of these are always accepted on input. The output format depends on the configuration parameter bytea_output; the default is hex. (Note that the hex format was introduced in PostgreSQL 9.0; earlier versions and some tools don't understand it.)
