Sprint Focus:			
Subject:	FAL: Move migration scripts into their own sub-namespace		
Description	<p>The FAL migration scripts had their own namespace. With the introduction of namespaces for the Core, this sub-namespace was removed. As all FAL tasks belong together (and for the sake of clear names), we should have them in their own namespace again. I propose something like TYPO3\CMS\Install\Updates\Resource (i.e., just add Resource as sub-namespace).</p>

History

#1 - 2012-09-02 15:59 - Andreas Wolf

- Status changed from New to Accepted

The scripts are currently also registered with sysext_file_*, which is complete nonsense. I doubt however that we're still able to change this, as it might possibly break already migrated installations.

#2 - 2013-07-30 02:06 - Wouter Wolters

- Status changed from Accepted to Needs Feedback

IMO we should not change this anymore. There are already a few new update wizard for FAL introduced. Can this be closed?

#3 - 2013-09-14 22:11 - Christian Kuhn

- Status changed from Needs Feedback to Closed

- Target version set to 6.2.0

Yeah, let's leave it as it is now. With 6.2 the update scripts were also renamed and moved to one central location.
