Subject:	Add FE group 0 by default in no one is given as parameter		
Description			
<p>Hi,</p> <p>environment: TYPO3 6.1</p> <p>I seems there is a problem computing the hash, if no FE group is given as parameter. FYI, I get this message "Hash invalid! Access denied!" for every file. A solution would be setting a FE group 0 by default in no one is given as parameter as done for FE user \$frontendUserId = 0;.</p> <pre>diff --git a/class.tx_nawsecuredl.php b/class.tx_nawsecuredl.php index 22ac5cc..b67476d 100644 --- a/class.tx_nawsecuredl.php +++ b/class.tx_nawsecuredl.php @@ -168,7 +168,7 @@ class tx_nawsecuredl { \$frontendUserGroupIds = t3lib_div::trimExplode(',', \$this->objFrontend->fe_user->user['usergroup'], TRUE); } else { \$frontendUserId = 0; - \$frontendUserGroupIds = array(); + \$frontendUserGroupIds = array(0); } \$cacheTimeToAdd = \$this->extensionConfiguration['cachetimeadd'];</pre>			

History

#1 - 2013-06-21 00:04 - anybody no-lastname-given

It seems to be a general problem. With Typo3 v4.7.x naw_securedl v. 1.6.1 produces links like

http://www.example.com/index.php?eID=tx_nawsecuredl&u=0&g=&file=path/file.end&t=1234567890&hash=131231231231321312312

This means, that always I get an empty group parameter (&g=&). It is equal whether the new group option is activated or not.

It's the same for me with TYPO3 4.5.25...

Thanks

#4 - 2013-07-25 13:14 - Eric Chavallaz

Is this fix with the last version uploaded in the TER?

Thanks

- *Status changed from Accepted to Closed*

- *% Done changed from 0 to 100*

Yes it's fixed in 1.7.1.

Dietrich
