Core - Task # 60249

Epic # 58282 (Accepted): Workspaces Workpackage #2

Story # 58284 (New): Bug fixes & Behaviour

Status:	Resolved	**Priority:**	Must have
Author:	Oliver Hader	**Category:**	Workspaces
Created:	2014-07-10	**Assigned To:**	Oliver Hader
Updated:	2014-08-13	**Due date:**	
TYPO3 Version:	6.2		
PHP Version:	5.3		
Complexity:			
Sprint Focus:			
Subject:	Publishing delete placeholder affects different workspaces as well		

Description

Scenario:

 - having two workspaces (1 and 2)

 - having a live record with uid 10

 - having a delete placeholder for uid 10 in workspace 1

 - having a delete placeholder for uid 10 in workspace 2

Action:

 - publish the delete placholder for uid 10 in workspace 1

Experience:

 - published delete placeholder for uid 10 in workspace 2 (which was not the active workspace)

Revision bbbd8146 - 2014-08-13 16:30 - Oliver Hader

[BUGFIX] Publishing delete placeholder affects other workspaces

On publishing a delete placeholder all other versions shall be
deleted as well, since the original record will be deleted after
that action. However, this is only valid for the live workspace
and using the legacy version behavior there.

DataHandler::deleteVersionsForRecord() calls
BackendUtility::selectVersionsOfRecord(), but without the
additional, but required, $workspace argument. Thus, all other
versions in other workspaces are deleted as well. The SQL query
to determine versions needs to be limited to either the live
workspace (for legacy versions) and the current workspace.

Resolves: #60249
Releases: master, 6.2
