Sprint Focus:			
Subject:	Fix misleading method name		

Description

Purpose of the initialize() method in AbstractAction is the initialization of a handle, not the general initialization of an action. Thus, the method needs to be renamed to clearly indicate its purpose.

[TASK] Refactor misleading method name

Purpose of the initialize() method in the AbstractAction class is the initialization of a handle. It is not intended to be used for generally initializing classes derived from AbstractAction.

By refactoring the method name, the method's purpose will be indicated more clearer.
