hmm, codewise, vera.ttf was only used in the install tool, thats why i moved the file to ext:install ... i was unaware that the file is referenced in the documentation. there is another font file, this one is in the core: nimbus.ttf, maybe the documentation could be changed so it only documents nimbus? If that is not feasible, we could also move vera.ttf back to ext:core again, I actually didn't wanted to break documentation in this regard.

Please feedback if we should tackle this codewise again. Moving the files two times was not a perfect thing either. If that was stupid, please tell me.

No, it's OK. I'll just update the path again.
