Subject:	TYPO3.Neos:Content NodeType as Reference in Inspector		

Description

The Inspector of Neos doest not suggest nodes of super type TYPO3.Neos:Content. This should work like with TYPO3.Neos.NodeTypes:Page nodes.

```
  'Blub.Bla:ContentType':
   superTypes: ['TYPO3.Neos:Content']
   ui:
     label: 'Color'
     group: 'plugins'
     icon: 'icon-adjust'
     inspector:
       groups:
         properties:
           label: 'Properties'
           position: 10
   properties:
    title:
     type: string
     translatable: TRUE
     ui:
       label: 'Title'
       reloadIfChanged: TRUE
       inspector:
         group: properties

  'Blub.Bla:Blo':
   superTypes: ['TYPO3.Neos:Content']
    colors:
     type: references
     ui:
       label: 'Colors'
       reloadIfChanged: true
       inspector:
         group: properties
         editorOptions:
           nodeTypes:
             - 'Blub.Bla:ContentType'
```

Hey Lars

Just tested it and for me it works fine using TYPO3.Neos:Content as node type. Here's the configuration I used.

```
'test':
  type: reference
  ui:
    label: 'test'
    inspector:
      group: 'document'
      editorOptions:
        nodeTypes:
          - 'TYPO3.Neos:Content'
'test2':
  type: references
  ui:
    label: 'test2'
    inspector:
      group: 'document'
      editorOptions:
        nodeTypes:
          - 'TYPO3.Neos:Content'
```
