Has patch:			
Affected Flow version:			
Subject:	F3\Fluid\Core\RuntimeException thrown in file TemplateVariableContainer.php		

Description

I tried to build some kind of tree by invoking a section/for recurse.

Template:
<f:section name="children">
   <f:for each="{parent.children}" as="child">   {indent}
      Child: {child.name}
      - #{child.objectUuid}
      - <a href="<f:uri.action action='deletenode' arguments="{parent:parent,child:child}" />">Delete
      - <a href="<f:uri.action action='createnode' arguments="{parent:child}" />">Create new child
      <f:render partial="admin_index_nodelist" section="children" arguments="{parent:child, indent:indent}" />
   </f:for>
</f:section>

Tried to remove a variable "child" which is not stored in the context!
