TYPO3 Version:	4.4		
PHP Version:	5.2		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	Add Update Wizards for Skinning Changes		

Description

- Check for $TYPO3_CONF_VARS[BE][compressionLevel] active and warn user to include the lines from misc/advanced.htaccess
- Check for having EXT:t3skin installed and warn user to install it or another 4.4 compatible skin

Both wizards are sufficient, if they simply warn the user that it will result in a broken backend otherwise.

I corrected the version
