Complexity:			
Affected Flow version:			
Subject:	Straight value property injection fails with strings in static object container		
Description			

If strings are to be injected as straight values via property injection, the resulting code in the static object container leads to

    Parse error: syntax error, unexpected ':' in
    /Users/karsten/Sites/typo3v5/Data/Temporary/f82c7e3cb126/StaticObjectContainer.php on line ...

or other similar errors.

This is because the generated code looks like (the string misses quotes):

    $o->setLayoutRootPath(package://TYPO3/Private/TypoScript/Layouts/);
