BTW: Powermail is not working with 4.2.4 because of patch 10146.

I confirm, Powermail is broken with 4.2.4. Same thing with ext:Commerce. Rolled-back to 4.2.3

All versions of tt_products do not work in latest TYPO3 4.3 from svn and also not in 4.2.4. The basket is always empty.
In install tool I have deleted the 'Encryption key:'. but I cannot regenerate it any more. The button 'Generate random key' does not react in FF3 and IE6.
