| **Subject:** | Set the default orderings from outside | | |

**Description**

I need support, please :)

The repository has the default orderings set in its repository class,

```
1 class CommentRepository extends \TYPO3\FLOW3\Persistence\Repository {
2
3   /**
4    * @var array
5    */
6   protected $defaultOrderings = array('creationDate' => \TYPO3\FLOW3\Persistence\QueryInterface::ORDER_DESCENDING);
7 ...
8 ?>
```

how is it possible to overwrite this from outside? Maybe it must even be substituted to a variant that allows setting this via Objects.yaml; but that I don't know surely.

*- Status changed from Needs Feedback to Closed*

can be resolved with core patch #42539.

**#2 - 2013-03-07 17:10 - Bastian Waidelich**

Hey Adrian,

you won't need a core patch, just override the ordering via

```
1 $this->commentRepository->setDefaultOrderings();
```

Nevermind, you probably wanted to change it from *outside of the comment package", right? and the core patch is already merged anyways
