PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Improve rendering of large exceptions		

Description	

Exceptions with a long message are hard to read when rendered with the DebugExceptionHandler currently:

Things could be improved by running the message through nl2br() and reducing the font weight

[FEATURE] Improve rendering of large exceptions

Splits exception messages containting multiple sentences and/or
line breaks into "subject" and "body" and renders the body with
nl2br().

- File Iframe.png added

Just an idea I wanted to check out: The exception renderer checking if the "more information" page exists and inserts it as IFrame if so.. Too invasive IMO, but this would be the result:
