Is Regression:	No
Sprint Focus:	

Subject:	getBaseValidatorConjunction is called for simple types

Description
I could observe this issue in the TYPO3\CMS\SysNote\Controller\NoteController->listAction:
The $pids argument is of type string. Still getBaseValidatorConjunction() is called which will return nothing because it does a class_exists() check at the beginning.
Since class_exists() seems to be expensive (autoload process is triggered) it could make sense to do a check with TypeHandlingUtility::isSimpleType() before doing the class_exists() check.

- Status changed from New to Accepted

We are into the issues of the validation api backport and we are planning to have a codesprint in january to fix these.

#2 - 2014-09-24 11:13 - Alexander Opitz

- Status changed from Accepted to Needs Feedback

Hi,

was this issue fixed or does it still exists?

#3 - 2014-10-08 13:37 - Alexander Stehlik

The initializeControllerArgumentsBaseValidators() method in the AbstractController class is still calling getBaseValidatorConjunction() which does a class_exists() check at the beginning. The issue is still existing but since #53962 was merged is is not that big of a problem any more I think.

You could still consider adding a check for TypeHandlingUtility::isSimpleType() which might be cheaper than class_exists() but this would need some performance testing.

#4 - 2014-10-13 11:32 - Alexander Opitz

- Project changed from Extbase MVC Framework to Core

- Category changed from Extbase: Validation to Extbase

- Status changed from Needs Feedback to New

- TYPO3 Version set to 6.2

- Is Regression set to No
