| **Updated:** | 2014-10-01 | **Due date:** | |
| **Subject:** | Publish own nodetypes throws a exception @ cache clearing | | |

**Description**

Another issue apperead while working with #56974

I've defined my own nodetypes with the following configuration

```
prototype(TYPO3.Neos:PrimaryContent).blogPost {
    condition = ${q(documentNode).is('[instanceof Meteko.Homepage:Post]')}
    type = 'Meteko.Homepage:Post'
    title  = ${this.title}
}

prototype(Meteko.Homepage:Post) < prototype(TYPO3.TypoScript:Template) {
    templatePath = 'resource://Meteko.Homepage/Private/Templates/TypoScript/Post.html'
    title = ${q(node).property('title')}
    node = ${node}

    # Render the main ContentCollection of the Post like a page would
    main = TYPO3.Neos:ContentCollection {
        nodePath = 'main'
    }
}

prototype(Meteko.Homepage:PostList) < prototype(TYPO3.Neos:Menu) {
    #items = ${q(site).find('[instanceof Meteko.Homepage:Post]')}
    templatePath = 'resource://Meteko.Homepage/Private/Templates/NodeTypes/PostList.html'
    itemCollection = ${q(site).children('blog').children().get()}
}
```

When i create a new page of my own nodetype, place some content element and publish the cache clearing chokes at this point

```
/var/log/apache2/error_log:27332:[Sun Mar 16 00:54:08 2014] [error] [client 127.0.0.1] PHP Fatal error:  Call to a member
function getIdentifier() on a non-object in
/Users/sorenmalling/Sites/Neos/Data/Temporary/Development/Cache/Code/Flow_Object_Classes/TYPO3_Neos_TypoScript_Cache_Con
ache_ContentCacheFlusher.php on line 72, referer: http://meteko.sma/neos/management/workspaces
```

at this place, it doe's a check for depth and tries to clear cache the for parent node. For some reason, the "parent" node (my custom page nodetype) can't seem to be resolved.
