Sprint Focus:	
Subject:	Use HTML5 label+checkbox semantics

Description

There is no common mark-up in the CMS backend for checkbox+labels in forms.
With the inclusion of Bootstrap we decide for the Bootstrap HTML5 markup syntax in forms:

See http://getbootstrap.com/css/#forms for preview and mark-up.

Forms do not receive a special markup.
Normal forms without layout (not horizontal, not filter-bar, not inline) include this syntax:

```
<form role="form">

  <div class="form-group">
    <label for="text">Label text</label>
    <input type="file" id="text">
    <p class="help-block">Example block-level help text here.</p>
  </div>

  <div class="checkbox">
    <label>
      <input type="checkbox">
      Check me out
    </label>
  </div>

</form>
```

In this first step we migrate the checkbox html towards HTML5 mark-up:

  1. Wrap checkbox group within   `<div class="checkbox"></div>`

  2. Move Input field into the   `<label>…</label>`

  3. Move the label text into the   `<label>…</label>`
 after the input checkbox

Why?
Ofter the checkbox and radio inputs are grouped and bring one description label for the group:

Behave like: [x] A

[-] B

Therefore the <label> tag is not formatted **bold** and the   <div class="checkbox">
 can also bring another group label.
