Revision e09416a3 - 2013-11-12 18:34 - Alexander Stehlik

[FEATURE] Make getPlaceholderValue recursive for __row

If __row|uid_foreign|field is a reference its not evaluated
recursive the placeholder shows a uid. With this patch the
content of the field is shown.

Additonally the type of the metadata field of sys_file was changed
to inline because select does not support the foreign_field property.

Resolves: #52630
