Text or pics or so

Me, myself and the ~~back~~frontend.

You won't need a manual or training to edit content in TYPO3 Neos - because you already know how to do that. It is as easy as clicking onto the part you wish to edit - and start. TYPO3 Neos' ingenious editing interface lets you focus on your task without you having to jump through hoops because your CMS tells you to do so.

What you write is what you get.

– Einfache Bedienung   – Kein Training nötig
– Kurze Einlernphase   – Intuitive Nutzung

Responsive web

When you create responsive websites, your CMS should naturally aid you by being responsive as well. But TYPO3 Neos goes further than that - it will automatically adjust your images for your audiences using progressive enhancement. Your websites will load faster, first more fluid and generate a better user experience than anything built with any other CMS on the market.

Since the advanced content editing mechanisms in TYPO3 Neos work together with your website you can change your contents directly within a responsive viewport - getting immediate results and reducing the time of testing your contents on different devices.

Learn more

Standing on the shoulders of a giant.

TYPO3 Neos is the successor of the world-class CMS. We took the experience of more than 500.000 websites built in TYPO3 and our collective expertise to build an entirely new kind of CMS.
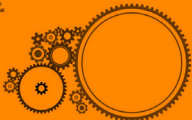

Easily extendable

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu, pretium quis, sem. Nulla consequat massa quis enim. Donec pede justo, fringilla vel, aliquet nec, vulputate eget, arcu.

Simple, reliable deployment

Manage your rollouts with ease by using TYPO3 Surf - run tests on the code and content your intend to deploy and only roll out when all tests pass. Never worry about launches again - **TYPO3 Neos has your back.**

Semantic SEO

Outrun the competition using TYPO3 Neos advanced semantic features. You can annotate your content according to the RDFa standard finding the search engines additional meta data in order to return machine-readable content right away.
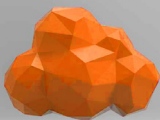

Connection to Flow

Manage your rollouts with ease by using TYPO3 Surf - run tests on the code and content your intend to deploy and only roll out when all tests pass. **Never worry about launches again - TYPO3 Neos has your back.**
