Complexity:	
Sprint Focus:	
Subject:	Remove tslib/media, cglify statictemplates/media

Description

One of them should be removed. But there are small changes in some files in both directories and subdirectories so one has to decide what to remove and what to modify and so on...

[TASK] Remove tslib/media, cglify statictemplates/media

The media folder in the TYPO3 core is duplicated: It resides once
in tslib/media and once in statictemplates/media. It is only used
in statictemplates.

This patch moves the already "cglfixed" files from tslib/media to
statictemplates and removes the superfluous media folder.
