Core - Bug # 58951

Status:	Closed	**Priority:**	Should have
Author:	Xavier Perseguers	**Category:**	
Created:	2014-05-20	**Assigned To:**	Xavier Perseguers
Updated:	2014-12-15	**Due date:**	
TYPO3 Version:	6.1		
PHP Version:	5.3		
Complexity:			
Is Regression:	No		
Sprint Focus:			
Subject:	show_item does not properly resolve MM group items		

Description

When showing record information, fields which are inline records wrongly use the number of references as foreign uid to fetch related items and compute the label instead of resolving the relation.

In fact, the relations are properly resolved but never used as $this->row is not overridden by the result of the data-preprocessing.

Seems like it is bound to TYPO3 6.x because former versions did not resolve the relation and only showed the number of children.

History

#1 - 2014-05-20 11:03 - Xavier Perseguers

The call to $treatData->renderRecord() in \TYPO3\CMS\Backend\Controller\ContentElement\ElementInformationController seems to be a bad idea since native date/time fields are then converted to timestamps. Using ->renderRecordRaw() instead solves this and should not have side-effect since TSC is skipped but only used for RTE processing.

#2 - 2014-05-20 11:10 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.
It is available at https://review.typo3.org/30233

#3 - 2014-05-20 15:09 - Tymoteusz Motylewski

sounds like a similar problem to one I reported here http://forge.typo3.org/issues/56882

#4 - 2014-05-22 15:19 - Gerrit Code Review

Patch set 2 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.
It is available at https://review.typo3.org/30233

#5 - 2014-07-21 17:10 - Caspar Stuebs

This Bug is related to #22970 reported since 4 Years and under review since 9 Month.

#6 - 2014-12-07 21:55 - Georg Ringer

- Status changed from Under Review to Closed

has been abandoned by the author because fixed

#7 - 2014-12-15 15:46 - Xavier Perseguers

- Subject changed from show_item does not properly resolve inline items to show_item does not properly resolve MM group items

- Status changed from Closed to New

- Target version deleted (next-patchlevel)

- TYPO3 Version changed from 6.2 to 6.1

My original bug report must not have been clear enough, I still have the problem, specifically with "group" records using 'MM' relation:

```
'config' => array(
    'type' => 'group',
    'internal_type' => 'db',
    'allowed' => 'tx_myext_domain_model_member',
    'foreign_table' => 'tx_myext_domain_model_member', // MANDATORY for Extbase
    'MM' => 'tx_myext_member_memberparrain_mm',
    'size' => 3,
    'autoSizeMax' => 5,
    'maxitems' => 5,
    'multiple' => 0,
),
```

The problem occurs when using the "INFO" button on a record. Column containing such a definition will hold the number of selected records as "value", and this value will be used as a uid since 'MM' is not checked.
