TYPO3.Fluid - Bug # 9434

Status:	Resolved	**Priority:**	Should have
Author:	Thomas Hempel	**Category:**	ViewHelpers
Created:	2010-08-24	**Assigned To:**	Sebastian Kurfuerst
Updated:	2010-10-20	**Due date:**	
Has patch:			
Affected Flow version:			
Subject:	f:if condition does not treat integers right		

Description

if you compare a discrete value with a negativ number it will always return true.

Example:

In the controller:

    $this->view->assign('value', -1);

In the Fluid template:

    {value}
    <f:if condition="{value} > -1">
       <f:then>
          is greater than -1
       </f:then>
       <f:else>
          is smaller or even -1
       </f:else>
    </f:if>

The result is:

    -1 is greater than -1

Expected result:

    -1 is smaller or even -1

[+BUGFIX] Fluid (Core): Boolean expressions can now contain negative numbers. Resolves #9434.

Boolean expressions with negative numbers did not work so far.

Now, they work as expected. Example from Viewhelpertest which displayed

a wrong result before, and now displays the correct result:

<f:if condition="{testVariables.number.minusOne} < -1.1">

   <f:then>Then part!</f:then>

   <f:else>Else part!</f:else>

</f:if>

Issue: #9434
