TYPO3.Flow - Bug # 39647

Status:	Closed	Priority:	-- undefined --
Author:	Kay Strobach	Category:	- Error Handler Report -
Created:	2012-08-09	Assigned To:	
Updated:	2012-08-09	Due date:	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version:	FLOW3 1.1.0 rc 2
Subject:	TYPO3\FLOW3\Error\Exception thrown in file ErrorHandler.php

Description

Hello Guys,

using FLOW3 on Windows seems to be impossible :(

Regards
Kay

Kay, not at all, it works fine on current Windows OSes.
Quick solution for your case: always run your CLI with Admin privileges (ie Start menu, type "cmd" and pres Ctrl+Shift while hitting Return, you should get a UAC prompt and land under C:\Windows\system32.

besides, check http://wiki.typo3.org/FLOW3_Installation_Hints for additional information. My Apache runs as system service, is hence also allowed to create symlinks.

I'll close this issue; that's no offense, don't hesitate to re-open, ask additional questions or join #flow3 at freenode.net (IRC).
