Base Distribution - Task # 44917

Story # 44913 (On Hold): RESTful NodeController for easy comment creation

Status:	Resolved	**Priority:**	Should have
Author:	Bastian Waidelich	**Category:**	
Created:	2013-01-29	**Assigned To:**	Bastian Waidelich
Updated:	2013-02-25	**Due date:**	
Subject:	Add support for transient nodes		
Description			

Simplify **NodeInterface** and create sub-interface **PersistedNodeInterface**.
Node templates implement the base NodeInterface and are not yet stored in the node repository.

Revision e6290640 - 2013-02-25 16:10 - Bastian Waidelich

[!!!][FEATURE] Support for transient nodes

Introduces a new transient node type "NodeTemplate".
Both Node and NodeTemplate implement the (simplified) interface NodeInterface.
Node additionally implement the interface PersistedNodeInterface that contains
stubs related to persistence and context.

Besides this adds TypeConverters for both, persisted nodes and node templates.

This is a breaking change if you referred to NodeInterface in your code. In this case
you should replace the reference with PersistentNodeInterface – unless you only
invoke methods defined in the NodeInterface.

Revision a68ab165 - 2013-02-25 19:26 - Bastian Waidelich

[TASK] Rename NodeInterface to PersistentNodeInterface

See Id1e7b624ece93106ec028eda432fd3e323b86bff for the related
changeset.

Besides this deprecates the NodeObjectConverter. If you use that in your
code, you should instead use the NodeTypeConverter from the TYPO3.TYPO3CR
package.

Revision b64d8a7e - 2013-02-26 13:37 - Adrian Föder

[BUGFIX] Correct node name pattern constant lookup

With Id1e7b624ece93106ec028eda432fd3e323b86bff the
constant ``MATCH_PATTERN_NAME`` has been moved from
``TYPO3\TYPO3CR\Domain\Model\NodeInterface`` to
``...PersistentNodeInterface`` which is herewith
updated in the ``NodeNameValidator``, too.

Revision 873ac606 - 2013-03-26 10:51 - Karsten Dambekalns

[TASK] Move MATCH_PATTERN_NAME (back) to NodeInterface

In change Id1e7b624ece93106ec028eda432fd3e323b86bff that pattern was
moved to the PersistentNodeInterface, but NodeInterface instances still
have a name, thus the pattern should stay in NodeInterface.

This changes moves it back and adds checks against the pattern in the
setName() methods of Node and NodeTemplate.
