TYPO3.Media - Bug # 44821

Status:	Closed	**Priority:**	Must have
Author:	Adrian Föder	**Category:**	
Created:	2013-01-26	**Assigned To:**	
Updated:	2013-01-26	**Due date:**	
Subject:	Migration file is not able to apply with current Doctrine		
Description			

When attempting to execute the MySQL migration file ...40946, introduced in I782ae08c80ebd65214baac2e163729ef442023c6 (
https://review.typo3.org/#/c/15515/), the following occurs:

$ ./flow doctrine:migrationexecute 20121011140946
Uncaught Exception
  Unknown database type bit requested,
  Doctrine\DBAL\Platforms\MySqlPlatform may not support it.

More Information
  Exception code   #0
  File   ...\Packages\Libraries\doctrine\dbal\lib\Doctrine\DBAL\Platforms\AbstractPlatform.php line 321

Probably that's of a new Doctrine "feature"?

Addition: ok, obviously the error message should be rather >>Unkown database type "bit" requested<<; this is the exception trail:

Uncaught exception in line 112 of ...\Packages\Libraries\doctrine\dbal\lib\Doctrine\DBAL\Schema\MySqlSchemaManager.php:
Unknown database type bit requested, Doctrine\DBAL\Platforms\MySqlPlatform may not support it.

25 Doctrine\DBAL\Platforms\AbstractPlatform::getDoctrineTypeMapping("bit")

aye we should add a "shame corner"... I had a table with this name, for some temporary testing purposes obviously...
