Fixes code style issues

This change adds a ton of @throws to docblocks and fixes other
documentation issues. Some code cleanup, like removing unused
variables and tweaking use statements is done as well.

Revision 08924c0c - 2012-04-25 23:21 - Karsten Dambekalns

[!!!][FEATURE] Make cache backends more flexible

This change makes cache backends more flexible. It adds a new interface
"TaggableBackendInterface" and a new "SimpleFileBackend". The latter
does not support tagging but is faster in certain cases (where with a
lot of tags/entries flushing everything is faster than flushing by tag).

If you have implemented a cache backend and support tagging, you must
add the "TaggableBackendInterface" to the list of interfaces implemented
by your backend.

In addition this change makes the PDO backend a little more robust and
resolves some code style issues.
