Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Subject:	Refactoring: Rename Components.ini to Components.php and transfer responsibility to configuration manager

Description
Currently each package may provide components configuration by means of a Components.ini file placed in the package's Configuration/ directory. This needs to be changed: The configuration file format should be changed to a unified .php configuration format and the files should be parsed and managed by the Configuration Manager.
