TYPO3.Neos - Bug # 30638

Status:	Resolved	**Priority:**	Must have
Author:	Roland Schenke	**Category:**	
Created:	2011-10-07	**Assigned To:**	
Updated:	2011-11-23	**Due date:**	
Subject:	no-brainer: typo in code annotation of SiteImportService::importFromPackage()		

Description

namespace TYPO3\TYPO3\Domain\Service

class SiteImportService

public function importFromPackage()

    /**
     * Checks for the presence of Content.xml in the given package and imports
     * it if found.
     *
     * @param string $packageKey
     * @return void
     * @author Karsten Dambekalns <karsten@typo3.org>
     * @author Christian Müller <christian@kitsunet.de>
      */
     public function importFromPackage($packageKey) {
    [...]
        } elseif (!file_exists('resource://' . $packageKey . '/Private/Content/Sites.xml')) {
    [...]

Code annotation mentions 'Content.xml' and file_exists() is looking for 'Sites.xml'.

Rolands-MacBook-Pro:TYPO3v5 rschenke$ git pull

Already up-to-date.

Rolands-MacBook-Pro:TYPO3v5 rschenke$ find . -name Content.xml

Rolands-MacBook-Pro:TYPO3v5 rschenke$ find . -name Sites.xml

./Packages/Sites/TYPO3.PhoenixDemoTypo3Org/Resources/Private/Content/Sites.xml

Rolands-MacBook-Pro:TYPO3v5 rschenke$

So I think Sites.xml is correct and Content.xml a left over. :-)

I assume this is a no-brainer, but I just wanted to mention it. :-)
