Subject:	Add feature minify on PAGE.includeJS

Description

It would be very great to have a minify feature on the includeJS array item like:

page.includeJS.common = fileadmin/templates/js/common.js
page.includeJS.common.minify = 1

(issue imported from #M11612)

#22546 now is part of the Core.

But compressing JS is not yet possible, right?
