TYPO3.Flow - Bug # 39674

Status:	New	**Priority:**	Should have
Author:	Adrian Föder	**Category:**	MVC
Created:	2012-08-10	**Assigned To:**	
Updated:	2012-08-10	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version:	(any)		
Subject:	\TYPO3\FLOW3\var_dump behaves weird in controller actions doing return		
Description			

doing this:

```
1    public function indexAction() {
2        \TYPO3\FLOW3\var_dump('vardump.');
3
4        return 'I am a return.';
5    }
```

results in a frontend (browser, response) output like this:

```
1<link rel="sty
2
```

funnily, the amount of characters being actually outputted correlates with the output length of the return; so

```
return 'f' . str_repeat('o', 30);
```

results in

```
 <link rel="stylesheet" type="te
(12345678901234567890123456789012) => 31 chars
```
