Subject:	Template Analyzer does not show Includes

Description

The Template Analyzer doesn't show Includes. But only in the Setup part, in the Constants it works fine.

Including a file in the Setup part like:
<INCLUDE_TYPOSCRIPT: source="FILE:fileadmin/template/ts/setup.ts">

The TS works fine in TYPO3, but isn't displayed in the Analizer.

Also the Backend Formular GUI isn't loading anymore while using the Radio Group.

- Status changed from New to Needs Feedback

I can't reproduce this on master as of today.

Info/Modify

You have to check the "Include TypoScript file content" checkbox below the editing form. File content then is included inline as expected in the editing form

Template Analyzer

The content of the <INCLUDE_TYPOSCRIPT: source="FILE:fileadmin/template/ts/setup.ts"> sources is **always** shown here.

Can you please give more Details/Screenshots if the problem still persists?

Hi Patrick,

as 6.2 beta 4 is the latest version, can you take a look there? If all is ok, I'd like to close this issue.

#6 - 2014-03-27 15:02 - Patrick Crausaz

I'm on the 6.2.0 stable. Anything works well.
